(54) EMULSIFIER COMPOSITION

(57)Abstract:

PURPOSE: To enhance usability and to improve stability, by preparing an emulsifier composition by compounding an oleophilic surfactant with HLB of 6 or less and a 20W22C branched aliphatic alcohol-EO adduct. CONSTITUTION: An emulsifier composition is prepared by compounding one or more of an oleophilic surfactant with HLB of 6 or more and one or more of a 20W22C branched aliphatic alcohol-EO adduct. As the oleophilic surfactant with HLB of 6 or less, glycerin monostearate and glycerin distearate etc., are designated. As the 20W22C branched aliphatic-EO adduct, there is POE(25)-2-octyl dodecyl ether. The base agent of this oil in water type emulsifier composition is proportionate to one used as the base agent of a massage agent and a cleansing agent.
